

# The Highest Specification Orbital Welding Equipment at the Lowest Market Price

## Oxygen Analysers

### The OXY- Integral

- 1 to 999 ppm measuring range
- Zirconium Oxide Cell for measurement accuracy and extended operational life
- Hand-held, light and portable
- Rechargeable battery pack with base station
- Detection Level Indication and Control
- Integrated sampling pump
- Can be used independently or interfaced with any make of orbital welding controller
- Interlock function for orbital welding applications

### The OXY-2 Orbital Welding Analyser

- 1 to 999 ppm measuring range
- Zirconium Oxide Cell for measurement accuracy and extended operational life
- Detection Level Indication and Control
- Integrated sampling pump
- Calibrated measurement of pure inert gases and gas mixtures
- Interlock function for orbital welding applications with Orbitec TIGTRONIC Controllers providing documented oxygen levels both before and during weld sequence
