Product Information

**Windows-Software for the documentation of analysis-results of MFA, OXYBABY®V and other WITT- equipment with integrated or separate analysis.**

**Benefits**

- quality control by means of data recording and storing with date and time
- individual product administration of lot no., article no., examiner etc.
- data-export interface for further read-out of the measured data in MS EXCEL®
- simultaneous logging from up to 8 analysers
- multilingual interface
- automatic identification of the connected WITT-Analyser

**System requirements**

<b>Operating system</b>	WINDOWS 95, 98, ME, NT 4.0, 2000, XP
<b>Hardware</b>	min. Pentium 200 MHz, 64 MB RAM 1 free serial interface, graphic resolution min. 800 x 600 Pixel
<b>Compatibility</b>	all MFA, OXYBABY®V, WITT-analysers and gas mixers with integrated analysers please specify device number with order
<b>Accessories</b>	connecting cable included in delivery
<b>Option</b>	USB-adapter cable

Technical Data

I4 subject to change

manufactures mixing, metering and control equipment as well as analysing systems and safety equipment for all common gases.
